

TELESCOPIC TORQUE REACTION ARMS

CAR series torque reaction arms are designed to eliminate the reaction that screwdrivers generate when they stop at the pre-set torque (up to 50Nm). Their carbon structure makes them extremely lightweight and incredibly resistant at the same time: for such reasons they resist degradation in high fatigue applications much better than conventional materials

Code	Model	Max torque	Max reach	Min reach	Weight
010663	CAR281	25 Nm	950 mm	490 mm	0,60 Kg
010664	CAR282	25 Nm	1650 mm	730 mm	0,75 Kg
010665	CAR501	50 Nm	950 mm	490 mm	0,65 Kg
010666	CAR502	50 Nm	1650 mm	730 mm	0,80 Kg
