AIMCO - WORLD CLASS QUALITY AND SELECTION...

AIMCO brings you the most complete offering of high quality bits, sockets and extensions available today.

These fastener tools, combined with the most complete line of world class assembly products, makes AIMCO your "total assembly solutions" source.

PRODUCTIVITY | ERGONOMICS | RELIABILITY | QUALITY

"Your winning formula in the race for world class manufacturing."

Featuring Ergo-Drive® Pulse Tool Extensions and Sockets - Designed Especially for Use with Pulse Tools

Custom Bits, Sockets and Extensions are also Available from AIMCO

Ergo-Drive®'s design provides a more efficient transfer of torque from tool to fastener than standard sockets and extensions.

The Ergo-Drive® system minimizes vibration to the operator in comparison to conventional sockets and extensions.

A wide variety of bits and nutsetters are available to drive virtually every style of fastener.

High quality manufacturing for long life.

Ergo-Drive® is also available in one-piece extended socket styles.

DESCRIPTION OF SOCKETS AND EXTENSIONS PART NUMBER NOMENCLATURE

AIMCO has assembled the most complete package of commonly used sockets and extensions in the industry. Our goal is to supply you with the highest quality sockets and extensions for all your fastener needs.

We ship all QuickShip items UPS 3rd day at ground rates.

Made to order specials are available upon request.

ERGO-DRIVE® SERIES

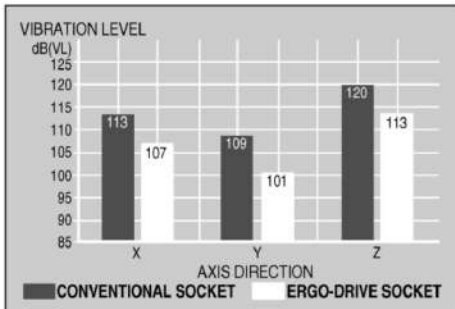

“Major manufacturers demanded the design of an extension and socket system to maximize pulse tool performance and fulfill manufacturing needs.

Standard extensions were not meeting the needs of pulse tool users and the Ergo-Drive® system was developed.”

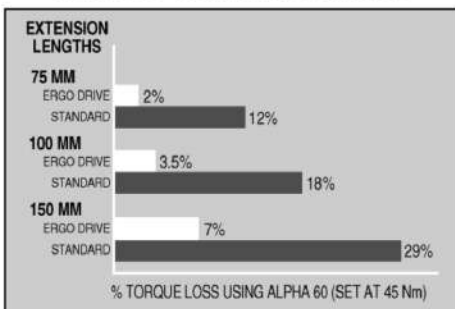

AN INVESTMENT WITH VALUABLE BENEFITS FOR PULSE TOOL USERS...

- Maximum tool performance - reduces torque loss during pulsing stage
- Increase productivity - reduces time loss during pulsing stage
- Ensure worker safety - virtually no vibration to the operator
- Increase socket life - reduces wear on sockets
- Increase tool life - reduced vibration means minimal wear on your tool

VIBRATION COMPARISON ERGO DRIVE® VS. CONVENTIONAL SOCKET

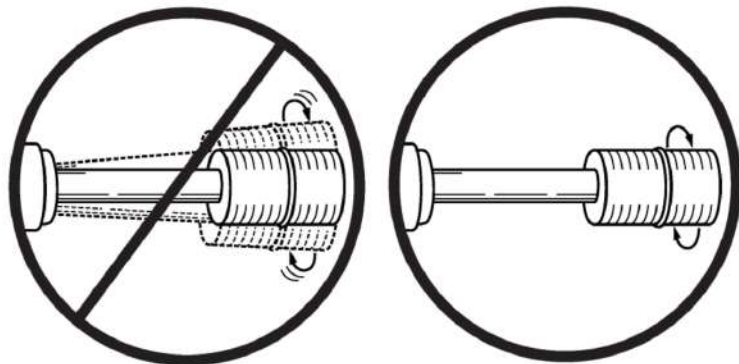

TORQUE LOSS COMPARISON ERGO DRIVE® VS. STANDARD EXTENSION

ERGO-DRIVE®'S UNIQUE DESIGN* REVEALS THE DIFFERENCE

Ergo-Drive®'s sleeve design allows secure, positive engagement over the anvil.

STANDARD EXTENSION
Standard extension design does not allow proper engagement over the pulse tool anvil and creates vibration and a “wobbling” effect creating wear on the tool and socket, as well as torque loss and exposure to the worker for possible injury.

ERGO-DRIVE®
Ergo-Drive® extension design provides deep engagement over the anvil to easily surpass the conventional design's performance.

* Patent Pending

PROTECT YOUR INVESTMENT!

ERGO-DRIVE sockets decrease vibration and wear on the most critical, most expensive component of the tool - the anvil.

PROTECT YOUR ASSEMBLERS!

ERGO-DRIVE sockets cause significantly less vibration during fastening than conventional sockets. This allows your assemblers to perform their jobs without the risk of vibration related injuries.

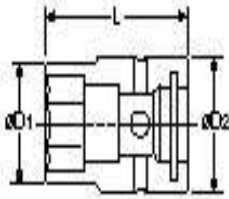

PROTECT YOUR PRODUCTS!

By reducing run-out and vibration, ERGO-DRIVE sockets allow the most repeatable, accurate rundowns to take place, ensuring excellent product quality.

BITS AND NUT SETTERS

AIMCO has assembled the most complete package of commonly used screwdriver bits and nut setters in the industry. Our goal is to supply you with the highest quality bits and nut setters for all your fastener needs. If you're in the electronics, aerospace or general industry, AIMCO has the bits and nut setters to fit your needs.

Most items are available in both American and Japanese industrial standards to properly fit your fasteners.

Made to order specials are available upon request.

CVF SOCKET

SAFETY ANTI-MAR PROTECTION

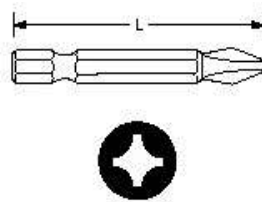

The protective cover allows operator better control, reducing risk of injury = **SAFETY**

The resin of the protective cover protects against marring = **ANTI-MARRING**

The anti-vibrational connection of the extension bar and socket has the advantages of = **MINIMIZING TORQUE LOSS** and better **ERGONIMICS**

Extensions and sockets are supplied standard with steel pin and rubber O-Ring. Steel O-Rings are available upon request at no extra charge.

Pin assemblies are also available for 3/8" and 1/2" square drive extensions and are sold separately. To order use part number 891-300-1 for 3/8" and 891-304-1 for 1/2". AIMCO will install upon request.

Torx Styles - T & E Type

Estilos Torx - Tipos T & E

T= Internal and requires a bit-style drive

E= External and requires a socket-style drive

SPECIALS

Especiales

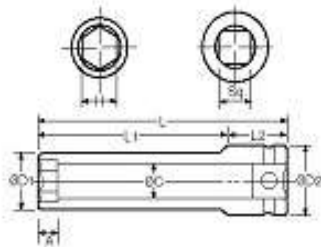

CUSTOM BITS, SOCKETS AND EXTENSIONS FOR THE POWER TOOL USER

AIMCO can provide specials for virtually any application. From design to delivery, AIMCO's quick response ensures high quality, tight tolerance specials.

Specials are available in every style including:

- Deep Socket
- Extended Socket
- Universal
- Allen Head
- Torx Head
- Socket Adapter
- Nut Runner Socket
- Nut Runner Joint
- Nut Setter
- Magnetic Nut Setter
- Universal Nut Setter
- Screwdriver Bits
